

The current complexity of the projects requires highly trained professionals to carry them out successfully. The Master's Degree in Project Management contributes to train highly qualified professionals to lead projects. This training has been designed in accordance with the UNE-ISO 21500 standard and two of the most important professional associations in the Project's scope: Project Management Institute (PMI) and International Project Management Association (IPMA). When the student completes this Master's Degree, he will have knowledge of the competencies for Project Management and the processes of Start, Planning, Monitoring, Control and Closing in a broad and multidisciplinary context taking into account to social responsibilities, environmental and ethical commitments which will enable him to lead projects of limited complexity or to integrate into complex project management teams. Find more information about the degree [here](#).
